**IMAGINATION IS THE PREVIEW OF  
LIFE'S COMING ATTRACTIONS**

## From the Principal's desk

Calling one a teacher or an educator is to undermine his / her role in making a child ready to take on the world. They are 'Child Architects'.

If only Gazi's invasion, Einstein's theory, Gandhi's Satyagraha, Pythagoras theorem and H2SO4 decided a child being successful in life, then the roads would be filled with Indira Nooyi, Vikram Pandit, K.V.Kamath, Sundar Pichai, Satya Nadella of the world.

Learning must hold a real world meaning for the child, leading them to discover, observe and help them derive at least a few direct applications of the content – essential to creating inventors, researchers and lifelong learners.

We need to create more conversations and opportunities for curiosity to be stoked.

Opportunities and spaces should be created that cause students to communicate with each other.

Technology today offers both students and teachers an astonishing choice of tools to gain and dispense knowledge.

I believe that Compassion, Collaboration, Communication and Creativity will take our children into the 21st Century with Creative confidence of an innovator, an entrepreneur and an empathetic human being.
